

Technologies

Thank you for your interest in our “Antimicrobial Shield 900 Series” of coatings. Ctg² Technologies along with Biomaster® and APPi have developed this new line of products for the Graphic Arts Industry. The Shield Series contains both Aqueous and UV coatings.

Ctg² Technologies can convert any of our coatings into an antimicrobial product protecting coating. This additive will make your printed piece antimicrobial product protected against unwanted microbes for the life of the coating. The Shield Series makes the surface 99.9% cleaner vs. untreated coatings and has 24/7 antimicrobial product protection!

Shield 900 Series of coatings:

AQC-AM900 Shield Aqueous Gloss

AQC-AM904 Shield Aqueous Folding Carton Gloss

AQC-AM920 Shield Aqueous Satin

AQC-AM924 Shield Aqueous Folding Carton Satin

AQC-AM940 Shield Aqueous Matte

AQC-AM910 Shield Aqueous High Rub Gloss

AQC-AM945 Shield Aqueous Soft Touch

UVC-AM950 Shield UV Gloss

UVC-AM960 Shield UV Satin

UVC-AM970 Shield UV Matte

Antimicrobial coatings can be purchased in the following packaging: 41# pails / 275# drums / 480# drums. These coatings can be applied offset, flexo, and gravure. For pricing or product inquiries please contact Michael Theriault @ 414.630.4573 or mt@ctg2technologies.com.
